What's new in The Darkness II:

: The Review The Darkness II is a good game. On that premise, there are dozens of reviews to be written; dozens more reviews that will be written down the line. This time, I'm holding my hands up, I'm going to say that this is a good game, and I'm going to risk the ire of the hordes of ogres who'll come out of the darkness and find this review and rip it up - quite literally. I have no idea if it can be redeemed any further than it's been lately; people do have a way of undermining confidence and convincing me that there's something wrong with it just because everything has been going so well. Whatever; the review is where that process takes place. I'll get the thing out of the way right up front that I don't think the game is playing fair, and then we'll see what it's like. The gravity-defying hyper-jumping up to the top of the screen and back down again, combined with the ability to drive while doing the hyper-jumping, is the game's biggest asset and the game's biggest problem. Starting close to a level, providing that you can pull off the jump without crashing, you'll be tasked with saving the kidnapped woman and the dimensionjacking canister by reaching the top of the roof. With difficulty progressing at a rapid pace, it can be difficult to find a level that, at least on my two attempts, has every platform on the

roof ready. It's about 30 seconds from inactivating the dimension canister to the point where the spikes start, so the challenge is, with the canister activated, finding a windfall on the roof (that's how The Darkness brand allows you to use doors) that isn't short of any gratuitous spikes and that also isn't in an area where you can't get a similar jump to reach the top of the roof on the next available area. What this means is that it works best towards the end of the game when, as hordes of level-as-a-whole triggered spikes come in to prevent you getting to the top of the roof to keep an eye on timed events. The wall of spikes that it's too difficult to avoid at the start of a level does make getting to the top of the roof almost impossible; I do
