We're sure you haven't played a video game and went, "Whoa! That's amazing!" while a cat was on screen just before you started the game. One day, we found a cute little cat in a supermarket and thought, "Why not develop a video game?" That's how CATch the Stars (CATch in short) was born! Q: How to create a multiline "shadow box" in OpenOffice? Is there a way to create a multiline shadow box in OpenOffice, like a caption box in a Word document? I need this in a spreadsheet. A: You can't change the background color of a cell, but you can use the "Format Shadowbox" feature. In Excel it is the button with the mouse: In OpenOffice.org it is the button in the cell's upper-right corner: A: In Microsoft Excel's upper-right corner, right-click a blank area of your spreadsheet and select "Format Shadowbox." Antoine Cousteau Antoine Cousteau (June 28, 1876 – July 25, 1964) was the son of Émile Cousteau and the brother of Philippe Cousteau. He was born in Nice, France and died in Palos Verdes, California. He was the uncle of Jacques Cousteau. Cousteau also became known for discovering and naming a number of marine animals. Early life Cousteau was born to Émile Cousteau (the founder of the marine exploration company) and Elodie (Gobet) Cousteau on the island of Maui in the Hawaiian archipelago. He was named after his uncle, Jean-Marie Cousteau. The name of the island where he was born was not recorded in his birth certificate. According to Cousteau's official biography, his parents decided that the god of their religion would name him. His parents' chosen god, Tee Kai, was associated with the sea. Education After attending the Lycée français in Honolulu, Cousteau attended the École normale supérieure in France. Cousteau was interested in diving and underwater exploration since childhood. In the early 1900s, Cousteau went to Southern California to study marine biology. He subsequently relocated to Hawaii

Hotaru is a difficult space style shoot 'em up with different waves of enemies, bosses and power-ups. The game has many choices, starting from two options. After you choose the color of your main ship, you can choose to be aggressive, go left, or go right. If you want to change your ship color, you can change the color of the one you have equipped in the ship menu. You have to press fire to shoot and jump to change directions. You have an unlimited supply of bullets to shoot enemies. If you hit them, you can use special power-ups. There are three different stages to complete, each stage with different enemies, bosses and power-ups. As you complete the stages, you get power-ups and save your progress at the end of each stage. After you complete the game, you can compete your best score to get the trophy. Controls Hotaru: The game has a colorful and fun main screen where you are able to read the information about your progress and to play different levels. You can navigate through the levels by clicking on the different levels using the arrow keys. At the top you can choose the wave of enemies you are going to encounter, the color of your ship and the difficulty of the level. The power-ups and a direction you can press to shoot appear at the right of the levels. You can press Fire to shoot bullets or the up arrow key to shoot your missiles or the down arrow key to shoot your laser beams. Tips Hotaru: Start the game by choosing your ship's color in the ship menu. After you finish the tutorial, the levels will appear. If you want to change the ship color, use the up and down arrow keys to move the ship between different levels. If you are having a hard time with the first level, you can replay the levels by pressing F6. You can also save your progress at the end of each level. If you complete a level, you will be able to access the next one. If you have killed all of the enemies on a level, you will be able to select the level you are going to encounter and you will be able to enter the next level. The mission and the obstacles are increasing as the game progresses. Power-ups like special bullets, special powers, shields and laser beams are revealed as
